

## **Genomics and Bioinformatics (Genomics) STP Open Day**

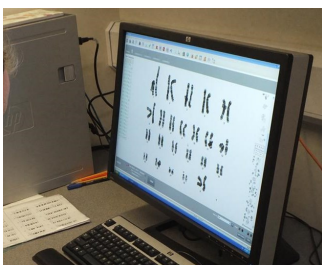

Are you interested in applying for the NHS Scientist Training Program (STP) in genomics or bioinformatics (genomics) to become a state-registered Clinical Scientist?

- Three years work-based training
- A fully funded MSc in Clinical Science
- Applicants require a minimum 2.1 relevant science degree or a 2.2 with relevant MSc

See <https://nshcs.hee.nhs.uk/programmes/stp/> for more information

The STP Open Day is a chance to visit the host laboratory, meet the scientific and technical staff, find out more information about the scheme and discover the exciting opportunities that a career in genomics or bioinformatics (genomics) can offer.

The Wessex Regional Genetics Laboratory comprises ~90 scientific, technical and support staff and is located at Salisbury District Hospital. We have close links with the University of Southampton and the Wessex Clinical Genetics Service and are a member of the WMOW Genomics Laboratory Hub

To register for the Open Day, please email [alisonhills@nhs.net](mailto:alisonhills@nhs.net)
